ABOUT **LYSONIR**

LYSONIR

LIBATON

Lysonir is an innovative supportive formula that boosts poultry immunity, powered by Lysozyme, Bacteriocins, MOS, and Beta-Glucan to strengthen health, enhance infection resistance, and improve treatment response with antibiotics – ensuring better balance, stability, and overall flock performance

Pakcage
250ml

Dose:

- 0,5-1ml/L for 3-5 days
- 250ml/5-7 Ton live body weight

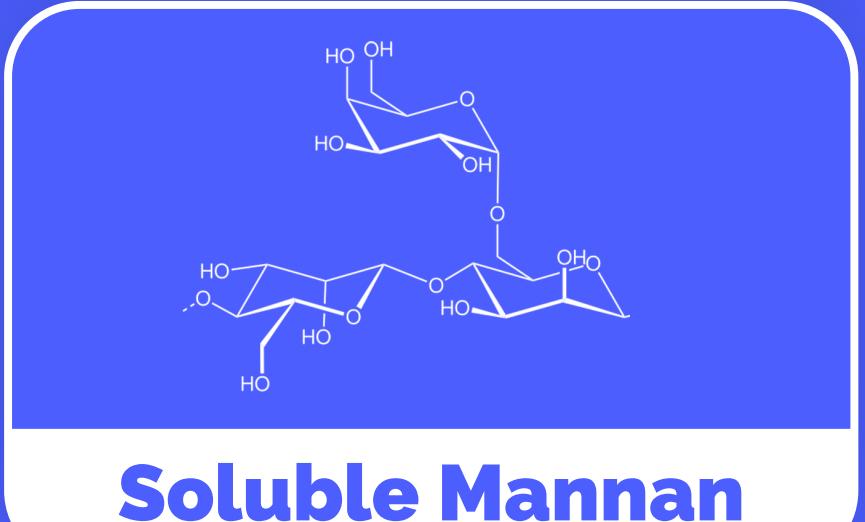

COMPOSITION

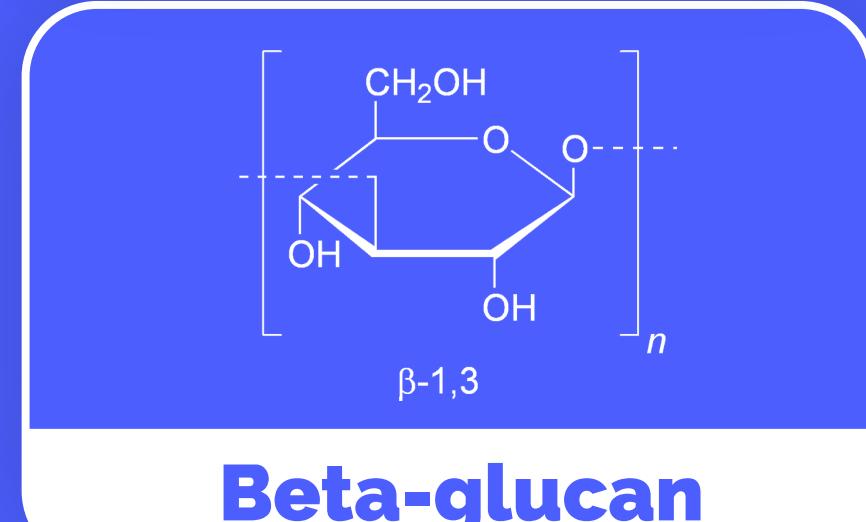

Lysozymes

Bacteriocins

Soluble Mannan

Beta-glucan

WHY LYSONIR

LYSONIR

LIBATON

Lysonir has powerful Supportive against bacterial infection:
by the important role of Lysozymes and bacteriocins which reduce the overall bacterial load and prevent infections to improve poultry flock health.

Lysonir has synergistic effect with Antibiotics:
When injected with antimicrobial agent to reduce pathogen loads for effective treatment program in poultry flocks.

Lysonir improves overall immunity and acting as immune modulator:
referring to soluble Mannan and Beta-Glucan. They stimulate the bird's innate immunity to reduce the bad effect of the infection which reflect on high flock performance.

Lysonir has effective Antiviral action:
as Lysozyme inhibit the virus replication and decrease the epidemiological pressure in poultry farms and decrease the viral load.

01

Anti-viral Agent, potent antiviral activity through interaction with viral nucleic acids due to its positive charge.

03

Immune System Enhancement, stimulate the bird's innate immune system, enhancing its ability to fight off infections.

Prophylaxis Against Bacterial Infections.

02

04

05

Gut Health and Nutrient Absorption Enhancement.

ABOUT **LIBATON**

LYSONIR

LIBATON

is a comprehensive liver and heart-support formula that promotes optimal metabolic balance, strengthens liver function, and enhances overall vitality and productivity in poultry under various stress conditions.

Pakcage
1 liter

Dose:

- 0.5 - 1 ml / Liter Drinking Water
- 3 – 5 Days

LIBATON

COMPOSITION

LYSONIR

LIBATON

Lipotropic agents:
D-L Methionine 2.5%, Natural Betaine 7%, Choline 4%, L-Carnitine 0.6%, and Lysine 2%

Detoxifying enzyme:
Carboxyl Esterase Enzyme

Propolis

Taurine

Essential Oils:
Olive Oil, Grape seed Oil, Linseed Oil, and Citrus Oil.

WHY LIBATON

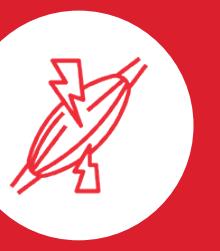

LYSONIR

LIBATON

Libaton Turn Fat into Performance:

Libaton activates the liver's lipotropic pathway - Methionine, Natural Betaine and Choline mobilize fat, while L-Carnitine drives fatty acids into mitochondria for clean energy resulting No fatty liver, better growth, stronger flock evennunder heat stress.

Heart & Muscle Strength in One Dose:

Libaton supports cardiovascular and muscle performance through Taurine and essential oils as high-value energy sources resulting Lower mortality in ascites, more vitality, better feed conversion.

Complete Metabolic Balance — Not Just Vitamins:

Libaton balances metabolism, protects the liver, boosts energy, and delivers real performance results for poultry farmers.

Protect Reproduction from Invisible Mycotoxins:

Libaton prevents damage to the ovary and improve egg quality Resulting Higher fertility and consistent egg quality during toxin challenges.

Built for Stress - Especially Heat & Adenovirus:

Libaton keeps birds eating, growing, and surviving under heavy stress like heat stress, ascites, and viral pressure.

|||||||

01

Improve fat metabolism and
Prevention of Fatty Liver Syndrome

Improve Cardiovascular & Muscle Health

02

03 Enhance Reproductive Performance
& Egg Quality

Neutralization of reproduction
mycotoxins

04

|||||||

05

Supportive treatment in case of heat
stress, ascites and viral infections
specially Adenovirus
